| Chap | oter 1: Introduction | |
| 1.1 | Purpose of the Study | |
| 1.2 | Brief Results, Scope and Future Perspective of the Work | : |
| Chap | oter 2: Literature Review | |
| 2.1 | Proteins and Protein Folding | |
| 2.2 | Biological Significance of Self-assembly of Collagen | (|
| 2.3 | Amyloid Formation and Its Related Pathologies | (|
| 2.4 | Strategies to Target Protein Aggregation Process | 9 |
| Chap | oter 3: Protein-Protein Interaction During in vitro Amyloid Formation | |
| 3.1 | Interaction Among Globular Proteins During Amyloid Formation | 1 |
| | 3.1.1 Occurrence of Coaggregation Between Soluble Protein Monomers | 1. |
| | 3.1.2 Conformational Changes Observed During Co-Aggregation of Proteins | 1 |
| | 3.1.3 Occurrence of Cross-Seeding Among Proteins during Amyloid Formation | 1 |
| | 3.1.4 Absence of Coaggregation and Cross-seeding Under Physiological Conditions of Buffer and Temperature | 10 |
| | 3.1.5 Sequence Similarity Analysis Among Globular Proteins | 1; |
| 3.2 | Prevention of Amyloid Formation by Collagen | 19 |
| | 3.2.1. Effect of Collagen on Amyloid formation of Lysozyme | 19 |
| | 3.2.2. Inhibition of Seeded Elongation of Lysozyme Amyloid Formation | 20 |
| | 3.2.3. Effect of Collagen on Lysozyme Activity | 20 |
| | 3.2.4. Effect of Collagen on Conformational Stability of Lysozyme | 2 |
| 3.3 | Discussion | 2 |
| 3.4 | Conclusion | 2 |
| Chap | oter 4: Effect of Selected Natural Compounds on Self-assembly of Proteins | |
| 4.1 | Antiamyloidogenic Activity of Eugenol | 2 |
| | 4.1.1 Eugenol Prevents Amyloid Formation of Globular Proteins | 26 |
| | 4.1.2 Effect of Eugenol on Coaggregation of Proteins | 28 |
| | 4.1.3 CD-Spectroscopy Studies | 30 |
| | 4.1.4 Fourier transform infrared spectroscopy (FTIR) Studies of Protein Aggregates | 3 |
| | 4.1.5 Intrinsic Fluorescence Studies of Eugenol-Insulin Interaction | 3 |
| | 4.1.6 Molecular Docking of Eugenol with Proteins | 3 |
| 4.2 | Capsaicin Inhibits the Process of Collagen Fibril Formation | 33 |
| | 4.2.1 Effect of Capsaicin on Fibril Formation of Type I Collagen | 35 |
| | 4.2.2 Effect of Capsaicin Against Enzymatic Degradation of Fibrillar Collagen | 35 |
| | 4.2.3 Hydrothermal Shrinkage of Tendons in the Presence of Capsaicin | 36 |
| | 4.2.4 Effect of Capsaicin on the Conformational Stability of Collagen Triple-Helix | 36 |
| | 4.2.5 Computational Docking Studies of Capsaicin with Selected Triple-Helical Collagen Model Peptides | 37 |
| 4.3 | Discussion | 4 |
| 4.4 | Conclusion | 4 |

| Chapter 5: Targeting Amyloid Formation of Proteins Through Surface-Functionalized | | |
| - | Nanoparticles | |
| 5.1 | Effect of AuNPs ^{Tyr} and AuNPs ^{Trp} on Insulin Amyloid Formation | 43 |
| | 5.1.1 Characterization of Tyrosine and Tryptophan Coated Metal Nanoparticles | 43 |
| | 5.1.2. Effect of Surface Functionalized NPs on Insulin Amyloid Formation | 45 |
| | 5.1.3. Effect of Surface Functionalized NPs on Conformational Properties of Insulin | 46 |
| | 5.1.4. Molecular Docking Studies of Tyrosine with Insulin | 48 |
| | 5.1.5. Effect of Reversing the Orientation of Tyrosine Attached to Nanoparticle | 54 |
| 5.2 | Discussion | 55 |
| 5.3 | Conclusion | 56 |
| Chap | eter 6: Conclusions | 57 |
| Anne | xure A: Materials and Methods | |
| A . 1 | Reagents | 59 |
| A.2 | Fluorescence Measurements | 60 |
| | A.2.1 Thioflavin-T Assay | 60 |
| | A.2.2 Protein-ligand Binding Assay | 60 |
| | A.2.3 Intrinsic Fluorescence Property of Proteins | 61 |
| A.3 | Amyloid Fibril Formation of Proteins | 61 |
| A.4 | Amyloid Fibrils Stability Study | 62 |
| A.5 | Circular Dichroism | 62 |
| A.6 | Transmission Electron Microscopy (TEM) | 62 |
| A.7 | Atomic Force Microscopy (AFM) | 62 |
| A.8 | ATR-FTIR Spectroscopy | 63 |
| A.9 | Activity Assay of Lysozyme | 63 |
| A.10 | UV-Visible Spectroscopy | 63 |
| | A.10.1 Collagen Fibril Formation | 63 |
| | A.10.1 Disassembly of collagen Fibrils | 63 |
| | A.10.1 Protein Concentration Measurements | 63 |
| ۸ | A.10.1 Sedimentation Assay | 64 |
| A.11 | Enzymatic Degradation of Collagen Tendons | 64 |
| A.12 | Hydrothermal Shrinkage Measurement of Tendons | 64 |
| A.13 | Native Gel Electrophoresis | 64 |
| A.14 | Synthesis of Amino Acid-Conjugated Gold and Silver Nanoparticles | 65 |
| A.15 | Computational Studies A.15.1 Sequence Similarity Analysis | 65 65 |
| | | 65 65 |
| | A.15.2 Molecular Docking Studies | 65 66 |
| | A.15.3 Decoy Analysis | 66 67 |
| Λ 16 | A.15.4 Insulin Dimer Analysis Data Processing | 67 67 |
| A.16 | Data Flocessing | 6/ |
