

List of Tables

| <i>Table</i> | <i>Title</i> | <i>Page</i> |
|--------------|---|-------------|
| 3.1 | Transition temperature values (T_m) of the studied globular proteins in physiological buffer conditions: BSA, Lysozyme, Insulin and Cytochrome c | 17 |
| 3.2 | Sequence analysis of the proteins | 18 |
| 4.1 | Summary of BSA–Eugenol Interaction complex having $-CDOCKER$ energy = 13.9359 Kcal mol ⁻¹ , $-CDOCKER$ interaction energy = 28.489 Kcal mol ⁻¹ | 33 |
| 4.2 | Summary of Insulin – Eugenol Interaction complex having $-CDOCKER$ energy = 4.03099 Kcal mol ⁻¹ , $-CDOCKER$ interaction energy = 13.4501 Kcal mol ⁻¹ | 33 |
| 4.3 | Hydrothermal stability of rat tail tendons (RTT) treated with different concentrations of capsaicin | 36 |
