-	oter 1: Introduction Motivation for Heart Monitoring	1
1.1	1.1.1 Burden of CVDs Worldwide	1
	1.1.2 Burden of CVDs in Indian Context	1 1
1.2	Objectives of the Thesis	2
1.3	Cardiac Anatomy and Cardiac Cycle	$\overline{3}$
_	1.3.1 Cardiac Anatomy	3
	1.3.2 Cardiac Cycle	3 4
1.4	Popular Cardiography Systems	4
	1.4.1 In Clinical Use	4 6
	1.4.2 Other Systems	6
1.5	Importance of Heart Sound Based Diagnosis Contributions of the Thesis	8
1.6	1.6.1 Performance Analysis of the PCG and SCG Systems in Various Real-life Scenarios	10 10
	1.6.2 Adaptive Thresholding Method for Wavelet Transform Based Denoising of the Heart	10
	Sound Signal	11
	1.6.3 A Method for Cancellation of Motion Artefacts from the Seismocardiogram Signal	11
	1.6.4 A Robust Algorithm for Segmentation of Heart Sound Signal using Tunable Quality	
	Wavelet Transform	11
	1.6.5 Assessment of Electro-mechanical Window using the Wearable Patch Based on SCG System	11
1.7	Thesis Outline	12
Char	ator 21 - Poviow of Portable Cardiography Systems	17
-	oter 2: Review of Portable Cardiography Systems	<b>13</b> 13
2.1	Introduction	13
-	Introduction Body Sensors	$\begin{array}{c} 13 \\ 14 \end{array}$
2.1	Introduction Body Sensors 2.2.1 Electrodes (Electrocardiography)	13 14 14
2.1	Introduction Body Sensors	$\begin{array}{c} 13 \\ 14 \end{array}$
2.1	Introduction Body Sensors 2.2.1 Electrodes (Electrocardiography) 2.2.2 Stethoscope (Phonocardiography) 2.2.3 Accelerometer (Seismocardiography) 2.2.4 Diode (Photoplethysmography)	13 14 14 15 16
2.1	Introduction Body Sensors 2.2.1 Electrodes (Electrocardiography) 2.2.2 Stethoscope (Phonocardiography) 2.2.3 Accelerometer (Seismocardiography) 2.2.4 Diode (Photoplethysmography) Signal Conditioning	13 14 14 15 16 16
2.1 2.2 2.3 2.4	Introduction Body Sensors 2.2.1 Electrodes (Electrocardiography) 2.2.2 Stethoscope (Phonocardiography) 2.2.3 Accelerometer (Seismocardiography) 2.2.4 Diode (Photoplethysmography) Signal Conditioning Analog to Digital Conversion and Compression	13 14 15 16 16 17
2.1 2.2 2.3 2.4 2.5	Introduction Body Sensors 2.2.1 Electrodes (Electrocardiography) 2.2.2 Stethoscope (Phonocardiography) 2.2.3 Accelerometer (Seismocardiography) 2.2.4 Diode (Photoplethysmography) Signal Conditioning Analog to Digital Conversion and Compression Wireless Module	13 14 14 15 16 16 16 17 19
2.1 2.2 2.3 2.4	Introduction Body Sensors 2.2.1 Electrodes (Electrocardiography) 2.2.2 Stethoscope (Phonocardiography) 2.2.3 Accelerometer (Seismocardiography) 2.2.4 Diode (Photoplethysmography) Signal Conditioning Analog to Digital Conversion and Compression Wireless Module Noise Suppression and Classification	13 14 14 15 16 16 16 16 17 19 20
2.1 2.2 2.3 2.4 2.5	Introduction Body Sensors 2.2.1 Electrodes (Electrocardiography) 2.2.2 Stethoscope (Phonocardiography) 2.2.3 Accelerometer (Seismocardiography) 2.2.4 Diode (Photoplethysmography) Signal Conditioning Analog to Digital Conversion and Compression Wireless Module Noise Suppression and Classification 2.6.1 Noise Suppression	13 14 14 15 16 16 16 17 19 20 20 20
