

## Acknowledgements

I thank my Ph.D. Thesis Supervisors, Professor *Head, Department of Bioscience and Bioengineering* and Professor *Ganesh Bagler*, for initiating me into the area of 'systems modeling' and for setting the premise for the objectives of my Ph.D. thesis. Apart from rigors of academic research, I have learnt professional work ethics from him. I am thankful to the members of the Doctoral Committee, *Dr. Karunakar Kar, Dr. Sushmita Jha and Dr. Samarvita Pal*, for their support.

I thank *Dr. Bibhas Adhikari* for encouraging me to develop analytical skills. I thank *Dr. Ambesh Dikshit* for his help in administrative matters during the doctoral program.

My stay at the Institute was an experience worth cherishing because of my friends and lab mates, *Supriyo Dutta, Vinay Pratap Singh, Deepak Bharti, Rakesh Kumar, Amit Bhati, Kapil Sharma, Megha Singh, Rakhi NK and Rahul Badhwar*. I thank all of them for the liveliness they infused into my time spent at IIT Jodhpur.

I also acknowledge and thank my family, especially my father *Sh. Shomnath Kanji*, for the constant support. I pay my respect to my *parents* for their love, sacrifices and blessings.

*Rakesh Kanji*  
Ph.D. Student
