Abstract	i
Acknowledgements	iii
Contents	v
List of Figures	vii
List of Tables	xi
List of Symbols	xiii
List of Abbreviations	xv
Chapter 1: Introduction	1
1.1 Motivation	1
1.2 Objectives	3
1.3 Contribution	3
1.4 Thesis organization	3
Chapter 2: Literature Survey	5
2.1 Network neuroscience	5
2.2 Networks in brain	5
2.3 Network motifs	7
2.4 Structural controllability	8
2.5 Structural balance	10
2.6 Brain functional networks	11
Chapter 3: Materials and Methods	15
3.1 <i>C. elegans</i> neuronal network	15
3.2 Random controls of CeNN	16
3.3 Topological properties of CeNN	16
3.2.1 Degree	16
3.2.2 Clustering coefficient	17
3.2.3 Characteristic path-length	17
3.2.4 Feed forward motifs	17
3.4 Structural controllability	18
3.4.1 Identification of driver neurons	18
3.4.2 Number of driver neurons	19
3.4.3 Hopcroft-Karp algorithm	19
3.4.4 Maximum matching algorithm	21
3.5 Study-specific materials and methods	21
3.6 Brain functional networks	22
Chapter 4: Control of neuronal network in <i>Caenorhabditis elegans</i>	25
4.1 Phenoframe	25
4.2 <i>Genoframe</i>	26
4.2.1 <i>Gene ontological enrichment</i>	27
4.2.2 <i>Essentiality of genes</i>	28
4.3 Results	28
4.3.1 Phenoframe of driver neurons	29
4.3.2 <i>Genoframe of driver neurons</i>	30
4.4 <i>Discussion</i>	33
Chapter 5: A distance constrained synaptic plasticity model of <i>C. elegans</i> neuronal network	35
5.1 Topological properties of CeNN	37
5.2 1D ring model of CeNN	38
5.3 CeNN follows distance constrained synaptic connectivity pattern	40
5.4 Distance constrained models of CeNN	40
5.4.1 Distance constrained random (DCR) model	41
5.4.2 Distance constrained synaptic plasticity (DCP) model	41

5.4.3 Cartesian graph model of CeNN	41
5.5 Results	41
5.5.1 Distance constrained random model	41
5.5.2 Distance constrained synaptic plasticity model	42
5.5.3 Identification of specific driver neurons	42
5.6 Discussion	44
Chapter 6: Robust sigmoidal control response of <i>C. elegans</i> neuronal network	45
6.1 Motif tuning algorithm (MTA)	46
6.2 Strategies for synaptic rewiring	47
6.3 Results	47
6.3.1 Distributed control architecture of CeNN	47
6.3.2 CeNN shows sigmoidal controllability response with change in FFMs	48
6.3.3 Response of CeNN to random versus distance constrained rewiring	49
6.4 Discussion	51
Chapter 7: Inhibitory synapses are central to structural balance in <i>C. elegans</i> neuronal network	53
7.1 Structural balance	53
7.2 Structural balance in neuronal networks	54
7.3 Construction of signed graph of CeNN	54
7.4 Balance index	56
7.5 Results	56
7.5.1 Signed graph	56
7.5.2 Balance index in CeNN	57
7.6 Discussion	58
Chapter 8: Network biomarkers of schizophrenia by graph theoretical investigations of Brain Functional Networks	59
8.1 Construction of brain functional networks	60
8.1.1 Preprocessing	61
8.1.2 Independent component Analysis	61
8.1.3 Brain functional networks and enumeration of network parameters	62
8.1.4 Feature classification	63
8.2 Results	63
8.2.1 Brain functional networks	63
8.2.2 Topological biomarkers of Schizophrenia	64
8.2.3 Top contributing features in binary and weighted BFNs	65
8.2.4 Efficacy of feature combinations	66
8.3 Discussion	66
Chapter 9: Summary	69
Annexure A : List of neurons in <i>C. elegans</i>	71
Annexure B : Genes expressed in <i>C. elegans</i> neurons	73
Annexure C : Non-normalized data for DCR and DCP models	81
Annexure D : Features used for classification of schizophrenic and healthy individuals	87
