Abstract	i
Acknowledgements	iii
Contents	v
List of Figures	viii
List of Tables	xi
List of Symbols	xii
List of Abbreviations	xiv
Chapter 1: Introduction	
1.1 Motivation	1
1.1.1 Sensible Heat Thermal Energy Storage System (SHTESS)	3
1.1.2 Latent Heat Thermal Energy Storage System (LHTESS)	4
1.1.3 Thermochemical Thermal Energy Storage System: (TCTESS)	5
1.1.4 Concentration Difference Energy Storage System: (CDESS)	5
1.2 Objectives	5
1.3 Thesis Outline	6
Chapter 2: Literature Review	
2.1 Latent Heat Thermal Energy Storage (LHTES)	9
2.2 Necessities of Latent Heat Thermal Energy Storage System (LHTESS)	9
2.3 Phase Change Materials (PCMs)	9
2.3.1 Phase Changes in PCMs	10
2.3.1.1 Solid-Solid Phase Change (SSPC)	11
2.3.1.2 Solid-Vapor Phase Change (SVPC)	11
2.3.1.3 Liquid-Vapor Phase Change (LVPC)	11
2.3.1.4 Solid-Liquid Phase Change (SLPC)	11
2.3.2 Essential Requirements for Selection of PCM	12
2.3.2.1 Thermodynamic Requirements	12
2.3.2.1.1 Suitable Melting Temperature	12
2.3.2.1.2 High Latent Heat	12
2.3.2.1.3 High Specific Heat	12
2.3.2.1.4 Congruent Melting	13
2.3.2.1.5 High Density	13
2.3.2.1.6 High Thermal Conductivity	13
2.3.2.1.7 Low Volume and Pressure Change	13
2.3.2.2 Kinetic Requirements	13
2.3.2.2.1 Little or No Supercooling	13
2.3.2.3 Chemical Requirements	14
2.3.2.4 Economic Requirements	14
2.3.3 Classifications of PCMs	14
2.3.4 Low Temperature PCMs	15
2.3.5 High Temperature PCMs	17
2.3.6 Thermal Conductivity Enhancement Techniques for PCMs	18
2.3.7 Applications of PCMs	23
2.4 Identified Gaps	24
Chapter 3: Experimental Details	
3.1 Structural and Microstructural Characterization Techniques	25
3.1.1 X-ray Diffraction (XRD)	25
3.1.2 Scanning Electron Microscope (SEM)	26
3.1.3 Raman Vibrational Spectroscopy (RVS)	27
3.1.4 Fourier Transform Infrared Spectrophotometer (FTIR)	28
3.2 Calorimetric and Thermal Conductivity Characterization Techniques	29
3.2.1 Differential Scanning Calorimeter	29
3.2.2 Temperature History (T-history) Measuring Setup	30

3.2.3	<i>Thermal Constant Analyser</i>	32
Chapter 4: Design and Development of Temperature-History Measuring Setup		
4.1	Introduction	35
4.2	Design Details of T-History Setup	36
4.3	Experimental Details	37
4.4	Results and Discussion	39
4.4.1	<i>Temperature Uniformity Inside T-history Air Chamber</i>	39
4.4.2	<i>Validation of T-History Results</i>	39
4.4.2.1	<i>T-History Measurements of Palmitic Acid</i>	39
4.4.2.2	<i>Differential Scanning Calorimetric Measurements of Palmitic Acid</i>	41
4.4.3	<i>Study of Supercooling</i>	42
4.5	Concluding Remarks	42
Chapter 5: Design and Development of Low Temperature Organic Eutectic PCMs		
5.1	Introduction	45
5.2	Computational and Experimental Methods	46
5.2.1	<i>Computational Details</i>	46
5.2.2	<i>Experimental Details</i>	47
5.3	Results and Discussion	48
5.3.1	<i>Differential Scanning Calorimetric Analysis of Pure Materials</i>	48
5.3.2	<i>Development of 1-Dodecanol and Fatty Acids Binary Eutectic PCMs</i>	49
5.3.2.1	<i>1-Dodecanol and Lauric Acid Eutectic PCM</i>	49
5.3.2.2	<i>1-Dodecanol and Myristic Acid Eutectic PCM</i>	50
5.3.2.3	<i>1-Dodecanol and Palmitic Acid Eutectic PCM</i>	51
5.3.2.4	<i>Analysis of Computational and Experimental Results</i>	52
5.3.2.4	<i>Thermal Conductivity Measurements</i>	52
5.3.3	<i>Benzoic Acid and Acetamide Binary Eutectic PCM</i>	54
5.3.4	<i>Benzoic Acid and Phthalimide Binary Eutectic PCM</i>	55
5.4	Concluding Remarks	56
Chapter 6: Development of Sodium Acetate Trihydrate –Ethylene Glycol Composite PCMs for Thermal Comfort and Therapeutic Applications		
6.1	Introduction	57
6.2	Experimental Details	59
6.3	Results and Discussion	59
6.3.1	<i>X-ray Diffraction Analysis</i>	59
6.3.2	<i>Fourier Transformation Infrared Spectroscopic Analysis</i>	60
6.3.3	<i>Scanning Electron Microscopic Analysis</i>	60
6.3.4	<i>Temperature- History Analysis</i>	61
6.3.5	<i>Differential Scanning Calorimetric Analysis</i>	64
6.3.6	<i>Microscopic Explanation of SAT-EG Interaction</i>	65
6.3.7	<i>Fabrication and Evaluation of PCM Heat Packs</i>	67
6.4	Concluding Remarks	68
Chapter 7: Design and Development of Low Cost Parabolic Concentrator to Charge Heat Packs in Extreme Conditions		
7.1	Introduction	69
7.2	Experimental Details	70
7.3	Results and Discussion	71
7.3.1	<i>Thermal Performance Analysis of Parabolic Dish</i>	71
7.3.1.1	<i>No Load Test Measurement</i>	71
7.3.1.2	<i>Load Test Measurement</i>	71
7.3.1.3	<i>Performance Characteristic Curve</i>	73
7.3.1.4	<i>Overall Thermal Efficiency of Dish Concentrator</i>	74
7.3.2	<i>Charging of PCM Heat Packs</i>	75
7.3.3	<i>Discharging of PCM Heat Packs</i>	75
7.4	Concluding Remarks	76

Chapter 8: Thermal Conductivity Enhancement of PCM Using Exfoliated Graphite	
8.1 Introduction	77
8.2 Exfoliation of Natural Graphite Flakes	78
8.2.1 Experimental Details	79
8.2.1.1 Materials	79
8.2.1.2 Preparation of Intercalated Graphite Compound and Thermal Exfoliation	79
8.2.2 Results and Discussion	80
8.2.2.1 Scanning Electron Microscopic Analysis	80
8.2.2.2 X-ray Diffraction Analysis	81
8.2.2.3 Raman Spectroscopic Analysis	82
8.3 Organic PCM-Exfoliated Graphite Composites	83
8.3.1 Preparation of MA-ExG Composites	83
8.3.2 Results and Discussion	84
8.3.2.1 Scanning Electron Microscopic Analysis	84
8.3.2.2 Fourier Transform Infrared Spectroscopic Analysis	84
8.3.2.3 Thermal Conductivity Analysis	85
8.3.2.4 Temperature-History Analysis	87
8.4 Inorganic High Temperature PCM-Exfoliated Graphite Composites	87
8.4.1 Experimental	87
8.4.1.1 Materials	87
8.4.1.2 Preparation of High Temperature Eutectic PCMs	88
8.4.1.3 Preparation of PCM-ExG Composites	88
8.4.2 Results and Discussion	89
8.4.2.1 Differential Scanning Calorimetric Analysis	89
8.4.2.2 Thermal Conductivity Analysis	90
8.5 Concluding Remarks	92
Chapter 9: Conclusion and Scope of the Future Work	
9.1 Summary	93
9.2 Scope of Future Work	94
References	97
