Abstract		*i*
Acknowledgements		*iii*
Contents		*v*
List of Figures		*vii*
List of Tables		*ix*
List of Symbols		*xi*
List of Abbreviations		*xiii*
Chapter 1:	**Introduction**	1
1.1	Motivation	1
1.2	Highlights of the thesis	4
1.2.1	*Literature review*	*4*
1.2.2	*Measuring balance of signed networks and its applications to sign prediction.*	*4*
1.2.3	*Eigenvalues of some signed graphs with negative cliques.*	*4*
1.2.4	*Characteristic and Permanent polynomials of Matrix.*	*5*
1.2.5	*B-partitions and applications to determinant and permanent of graphs.*	*5*
1.2.6	*Parametrized complexity of matrix determinant and permanent.*	*5*
1.2.7	*Conclusion and future work*	*5*
Chapter 2:	**Literature Survey**	7
2.1	Notation and basic definitions	7
2.2	Signed network, balance	8
2.3	Sign prediction	9
2.4	Matchings and Coates digraph	9
2.5	Determinant, permanent and their complexities	11
Chapter 3:	**Measuring Balance of Signed Networks and its Application to Sign Prediction**	13
3.1	Walk-based measure for degree of lack of balance	13
3.1.1	*Limitations of this method for undirected large signed networks*	*14*
3.2	Parameterized walk-based measure for lack of balance	15
3.2.1	*Values of parameters β, k*	*16*
3.2.2	*Lack of balance in random and real world signed networks*	*17*
3.2.3	*Variation with parameters*	*22*
3.3	Sign prediction in signed networks	22
3.4	Conclusion	24
Chapter 4:	**The Eigenvalues of Some Signed Graphs With Negative Cliques**	25
4.0.1	*Preliminaries*	*25*
4.1	The characteristic Polynomial of signed cycle and path graph	27
4.1.1	*The eigenvalues of signed C_n*	*28*
4.1.2	*The characteristic polynomial of P_n*	*30*
4.2	The complete graph with negative cliques of same order	31
4.3	The complete graph with negative cliques of different order	35
4.4	The characteristic polynomial of regular star block graph	37
4.5	The spectrum of completely-path weakly balanced signed graphs	38
4.5.1	*Eigenvalues of N*	*40*
4.5.2	*The spectrum of completely-cycle weakly balanced signed graph*	*42*
4.5.3	*Eigenvalues of N*	*44*
4.6	Conclusion	44
Chapter 5:	**On Characteristic and Permanent Polynomials of a Matrix**	45
5.1	Recursive form of the characteristic and the permanent polynomial	47
5.2	$\mathscr{B}$-partitions of a digraph	48
5.3	The Characteristic and Permanent Polynomial of Matrix	50
5.4	The determinant of digraphs	55
5.4.1	*The determinant of the Block Graph*	*56*
5.5	Conclusion	58

Chapter 6: $\mathscr{B}$-partitions, its Application to Determinant and Permanent of Graphs 59
6.1 Basic terminology 59
6.2 Preliminary results 61
6.3 $\mathscr{B}$-partitions, determinant and permanent of block graphs 61
6.3.1 Block graph with negative cliques. 64
6.4 Determinant and permanent of signed unicyclic graphs 65
6.5 Mixed complete graph, mixed star block graph. 69
6.5.1 Mixed star block graph 70
6.5.2 Negative mix complete graph 72
6.5.3 The determinant of negative mixed star block graph 72
6.6 Conclusion 74

Chapter 7: An Algorithm for $\mathscr{B}$-partitions, and Parameterized Complexity of Determinant and Permanent 75
7.1 Algorithm for $\mathscr{B}$-partitions 75
7.2 Parametrized complexity of determinant and permanent 77
7.2.1 Parametric complexities 78
7.3 Conclusion 79

Chapter 8: Conclusion and Future Work 81
8.1 future work 81
