

## List of Tables

<i>Table</i>	<i>Title</i>	<i>page</i>
3.1	$n$ : number of vertices, $m^+$ : number of positive edges, $m^-$ : number of negative edges, $\Delta^+$ : number of balanced triangles, $\Delta^-$ : number of unbalanced triangles, $\kappa$ : edge density $= \frac{2(m^+ + m^-)}{n(n-1)}$ , $\ A\ _\infty$ is infinity norm of adjacency matrix of $G$ , RN: random network.	15
3.2	Degree of lack of balance of networks for different parameters.	18
3.3	% of successfully predicted sign using different $\beta$ values and $P$	23
3.4	% of successfully predicted sign using different $\beta$ values and $P$ for Sparse dataset	24
