Abstract	page
Acknowledgements	i
Contents	iii
List of Figures	v
List of Tables	vii
	viii
Chapter 1: Introduction to Conflicts and Thesis Structure	1
1.1 Motivation for Conflict	2
1.2 Modelling the Restrictions/ Conflicts	3
1.3 More Problems in Literature on Conflicts	4
1.3.1 Conflicts in Software Engineering	4
1.3.2 Conflicts in Some Classical Problems	6
1.3.3 Conflicts in Geometry	8
1.4 Our framework for Conflicts	10
1.4.1 Graphical Model	11
1.4.2 Matroidal Model	12
1.5 Problems considered in Thesis	13
1.6 Overview of Results and Structure of Thesis	17
Chapter 2: Preliminaries	19
2.1 Parameterized Complexity	19
2.2 Graphs	21
2.3 Approximation Algorithms	22
2.4 Few other terminologies	24
Chapter 3: Parameterized Complexity of Conflicts as Matching	25
3.1 Polynomial time Algorithm for Semi-discrete Fréchet distance	27
3.2 Hardness of Conflict-free Fréchet distance Problem	27
3.3 Fixed Parameter Tractable Algorithms	30
3.3.1 Randomized algorithm	30
3.3.2 Branching algorithm	32
3.4 Kernel Lower bound	34
Chapter 4: Parameterized Complexity of Conflict as Bounded Arboricity Graph	37
4.1 Fixed Parameter Algorithms: Proofs of Theorems 1 and 2	39
4.1.1 FPT Algorithms for GRAPHICAL CF-SC	39
4.1.2 FPT Algorithm for $(\mathcal{P}, \mathcal{I})$ -MATROIDAL CF-SC	41
4.2 Hardness	45
Chapter 5: Approximation for Conflict as Matching	47
5.1 Approximation algorithm for Conflict-free Fréchet distance	47
Chapter 6: Approximation for Conflicts as Geometric Graphs	51
6.1 A General Framework	52
6.2 Different Geometric Graph Classes that Fits the Restrictions	54
6.3 Approximation Hardness	57
References	61
