Abstract	i
Acknowledgements	iii
Contents	v
List of Figures	viii
List of Tables	xi
List of Symbols	xii
List of Abbreviations	xiii
Chapter 1: INTRODUCTION	
1.1 Photovoltaic technology	1
1.2 Motivation	1
1.3 Objective	3
1.4 Outline of the thesis	3
Chapter 2: Review of literature & Experimental Techniques	
2.1 Photovoltaics	5
2.2 Solar radiation	5
2.3 Shockley Queisser Efficiency Limit	6
2.4 Diode equivalent circuit and Current-voltage characteristics of the solar cell	7
2.5 Deposition of CZTS thin film	8
2.5.1 Sputtering	8
2.5.2 Evaporation	9
2.5.3 Electrodeposition	9
2.5.4 Nanocrystal synthesis	10
2.5.5 Sol-gel	10
2.6 Barriers towards high efficiency	10
2.6.1 Narrow phase stability	11
2.6.2 Defects in absorber	12
2.6.3 Band offset at heterointerface	13
2.6.4 Non optimum back contact	15
2.7 Possible improvements for efficiency boost	15
2.7.1 Preferential etching of absorber	15
2.7.2 Intermediate layer between absorber and back contact	16
2.7.3 Alkali metal doping	18
2.7.4 Implementing double layer architecture	19
2.7.5 Substitution with foreign element	19
2.8 Experimental characterization	19
2.8.1 X-ray diffraction (XRD) technique	19
2.8.2 Scanning electron microscopy (SEM)	20
2.8.3 Energy dispersive X-ray spectroscopy (EDS)	21
2.8.4 Atomic force microscope (AFM)	21
2.8.5 UV-Vis spectrophotometer	22
2.8.6 Infrared and Raman spectroscopy	22
2.8.7 Electrical and impedance characterization	23
Chapter 3: Solar cell fabrication and characterization	
3.1 Substrates cleaning	25
3.2 Deposition of Mo layer	25
3.3 Chemical bath deposition of CdS layer	26
3.4 RF/DC sputtering of i-ZnO/Al:ZnO layer	27
3.5 Scribing	28
3.6 Device structure	28
Chapter 4: Effect of precursors on CZTS thin film prepared using Sol-gel spin coating	

4.1	Introduction	31
4.2	Formation of CZTS sol for spin coating	31
4.3	Deposition of CZTS thin film	33
4.4	Result and Discussion	33
4.5	Conclusion	39

Chapter 5: Electrical and Impedance characterization of sol-gel prepared CZTS thin film solar cell

5.1	Introduction	41
5.2	Experimental details	41
5.3	Result and discussion	42
	5.3.1 Structural and microstructural characterization	42
	5.3.2 Optical characterization	44
	5.3.3 Current –Voltage characteristics of CZTS device	45
	5.3.4 Capacitance voltage (C-V) characteristics and Mott-Schottkey analysis	46
	5.3.5 Impedance Spectroscopy analysis	47
	5.3.6 Conclusion	51

Chapter 6: Impact of excess Sn and low temperature processing on $\text{Cu}_2\text{ZnSnS}_4$ and their device performance: A ^{119}Sn Mossbauer Study

6.1	Introduction	53
6.2	<i>Experimental details</i>	54
6.3	<i>Result and Discussion</i>	55
6.4	Mössbauer spectroscopic measurement	57
6.5	<i>Electrical characterization</i>	59
6.6	<i>Al:ZnO/i-ZnO/CdS/CZTS/Mo/SLG Device fabrication and characterization</i>	60
6.7	<i>Capacitance voltage characterization</i>	60
6.8	<i>Photovoltaic characteristics</i>	61
6.9	<i>Conclusion</i>	61

Chapter 7: One dimensional simulation of CZTS heterostructure: Single & tandem junctions

7.1	Introduction	63
7.2	<i>Materials' properties and simulation approach</i>	64
7.3	<i>Device analysis for a single junction solar cell with CZTS and CZTSe absorber layers</i>	66
	7.3.1 <i>Impact of absorber layer thickness on single junction photovoltaic performance</i>	66
	7.3.2 <i>Impact of absorber layer acceptor concentration on single junction photovoltaic performance</i>	67
	7.3.3 <i>Impact of defect concentration at absorber and at absorber/CdS interface</i>	68
	7.3.4 <i>Impact of buffer layer</i>	69
	7.3.5 <i>Impact of Back contact work function</i>	72
	7.3.6 <i>Design and analysis of CZTS/CZTSe tandem solar cell structure photovoltaic device</i>	72
7.4	Conclusion	75

Chapter 8: Theoretical studies of $\text{Cu}_2\text{ZnGe}(\text{S}/\text{Se})_4$ absorbers using density functional theory

8.1	Introduction	77
8.2	Computational details	78
8.3	Result and discussion	78
	8.3.1 Structural properties	78
	8.3.2 Electronic properties	80
	8.3.3 Optical properties	82
8.4	Conclusion	87

Chapter 9: Conclusion and Scope of the Future Work
