

## Acknowledgments

As a matter of first importance, I wish to express my significant thankfulness to my advisors, *Dr. Anand K. Plappally* and *Dr. Rakesh K. Sharma*. I wish to say thanks to them for teaching the production and manufacturing system innovation in mechanical and structural engineering. Further, I thank them for tolerating and supporting all through my graduation period. Their supervision led me to understand the key concepts of interdisciplinary work areas of Probabilistic Methods in Engineering, Rural Construction Materials, Management and Manufacturing, WASH Technologies, Solid Waste Management, Composites and Sintering.

A genuinely awesome thanks to my first educator, my mother, and my closest companion *Smt. Vimla Satankar*. You are a genuine power of nature, and what you intend to me is amazing. Much obliged to you for offering to mean adoration like no other, and for the incalculable demonstrations, deeds, and words that have shaped me into what I am today, and what I will become tomorrow, it is your name that ought to be engraved on the degree, not mine.

All that I have finished in life is pivoted to one individual, my life partner *Smt. Seema Satankar* from guaranteeing my training didn't end rashly, to giving a shoulder on which I could lay, consume and be renewed. *Master Shashwat*, my loving son provided me with bursts of stress relief during the whole journey.

Uncommon because of my affectionate brother *Sanjay Satankar*, sisters *Sangeeta Satankar* and *Bharti Satankar* for their unequivocal love, care, support and kindness all through my vocation and life. Much obliged to all of you for being my friend and for being an extraordinary wellspring of motivation. My earnest appreciation goes to my father, *Sh. Ram Singh Satankar* for the colossal help and bolsters all as the years progressed.

I might want to stretch out my thankfulness to your life. I wish to state a unique thank you to the individuals from my research group gathering, *Aditya Raw Gautam*, *Amrita Kaurwar*, *Lovelesh Dave*, *Praveen Suthar*, *Bhagyawardhan*, *Devaiyah Soyam* and *Sandeep Gupta* for the warm and expansive shoulders, and for continually paying special mind to me.

My most extreme thankfulness goes to my Ph.D. committee members: *Dr. Prodyut Chakraborty*, *Dr. Mahesh Kumar* and *Dr. Satyajit Sahu* for their priceless remarks, recommendations, direction and talks. I thank the Arna Jharna Desert Museum, Jodhpur, Rajasthan, India to arrange for my interaction with *Sansi* or *Santhi* or *Bhilki* community (A nomadic tribe of Rajasthan).

I take this opportunity to the national and international reviewers of this work for helping to improve the quality of parameter and bring much clarity to the concepts discussed within this thesis.

Lastly, I want to thank Center of Excellence in System Science is providing me admission to pursue a PhD at IIT Jodhpur. Further, I also wish to thank Mechanical Engineering Department, IIT Jodhpur for all the support during the span, I spent developing my Ph.D. here. I might likewise wish to thank *Mr. Razak (Abdul) Khan*, *Mr. Farukh Khan* and other pottery knowledge holders in western Rajasthan. Further, I thank the potter community of Tindivanam (ENACTUS, IIT Madras), Tamil Nadu and Samastipur (Sehgal Foundation), Bihar in India for the magnificent experience, I gained working with them.

*Raj Kumar Satankar*  
Ph.D. Student
