Abstract	i
Acknowledgements	iii
Contents	v
List of Figures	vii
List of Tables	ix
List of Symbols	xi
List of Abbreviations	xv
Chapter 1: Introduction	1
1.1 Concentrated Solar Thermal Technologies	1
1.2 Solar Air Tower Simulator (SATS) Facility	4
Chapter 2: Open Volumetric Air Receiver: Literature Review	9
2.1 Design and Experiments	9
2.2 Heat Transfer Analysis	12
2.3 Issues and Challenges	16
2.3.1 Dust Deposition in an Absorber Pore	16
2.3.2 Flow Instability at High Temperature	17
2.4 Objectives of the Thesis	18
Chapter 3: Detrimental Effect of Dust Deposition	19
3.1 Dust Deposition: Experiments	19
3.2 Dust Deposition: Heat Transfer	20
3.2.1 Two-dimensional Model: Circular Straight Channel	20
3.2.1.1 Thermal Resistance	21
3.2.1.2 Heat flux distribution	22
3.2.1.3 CFD Analysis: Clean and Partly Blocked Pore	24
3.2.1.4 Results	26
3.2.2 Three-dimensional model: Square Straight Channel	28
3.2.2.1 CFD Analysis	28
3.2.2.2 Results	29
3.3 Summary	30
Chapter 4: Cleaning of Absorber Pore	31
4.1 Particle Motion in a Cyclone Separator	32
4.2 Pressure-drop in a Cyclone Separator	34
4.3 Evaluation of a Cyclone Separator	34
4.3.1 Experiment: Pressure-drop	34
4.3.2 Numerical Analysis	35
4.4 Results and Discussion	36
4.4.1 Validation	36
4.4.2 Physics of Dust Removal	37
4.4.3 Pressure-drop Coefficient	39
4.4.4 Effect of Air Temperature on Pressure-drop	41
4.5 Summary	42
Chapter 5: Limiting Factors: Operating Condition of the Receiver and Thermally Induced Flow Instabilities	43
5.1 Operating Condition	43
5.1.1 Pressure-drop: Receiver with Cyclone Separator	43
5.1.1.1 Cylindrical Absorber	44
5.1.1.2 Effect of Dust Deposition on Pressure-drop	47
5.1.1.3 Pressure-drop: Open Volumetric Air Receiver	47
5.1.2 Assessing an Open Volumetric Air Receiver for an Arid Desert Condition	48
5.1.2.1 Performance of an Open Volumetric Air Receiver	48

5.1.2.2	<i>The Operating Conditions of an Open Volumetric Air Receiver</i>	49
5.2	Thermally Induced Flow Stability: Analysis	50
5.2.1	<i>Numerical Simulations and Results</i>	53
5.2.2	<i>Flow Stability: Effect of Dust Deposition</i>	55
5.3	Summary	56
Chapter 6: One-dimensional Zonal Model		57
6.1	Mathematical modeling	57
6.1.1	<i>Material Properties</i>	59
6.1.2	<i>Heat Transfer Correlations: Nusselt Number</i>	59
6.1.3	<i>Calculation of View Factors</i>	60
6.1.3.1	<i>View Factor between Central and Peripheral Absorber</i>	60
6.1.3.2	<i>View Factor between Casing and Peripheral Absorber</i>	62
6.2	The Governing Equations	64
6.2.1	<i>Casing</i>	64
6.2.2	<i>Absorbers</i>	66
6.2.2.1	<i>Peripheral Absorber</i>	66
6.2.2.2	<i>Central Absorber</i>	68
6.2.3	<i>Primary Air</i>	70
6.2.3.1	<i>Primary Air Flow in Peripheral Absorber</i>	71
6.2.3.2	<i>Primary Air Flow in Central Absorber</i>	71
6.2.4	<i>Return Air</i>	72
6.2.4.1	<i>Region r_p</i>	73
6.2.4.2	<i>Region r_c</i>	73
6.3	Numerical Solution	74
6.4	Results and Discussion	75
6.4.1	<i>Validation</i>	75
6.4.2	<i>Time Dependent Development of Temperature</i>	76
6.4.3	<i>Effect of Heat Flux Distribution</i>	77
6.4.4	<i>Effect of Power to Air Mass Flow Rate Ratio</i>	78
6.4.5	<i>Effect of Absorber Porosity</i>	78
6.4.6	<i>Effect of Absorber Diameter</i>	79
6.4.7	<i>Effect of Smallest Gap between Absorbers</i>	79
6.4.8	<i>Effect of Air Return Ratio</i>	80
6.4.9	<i>Effect of Differential Heating</i>	80
6.5	Summary	81
Chapter 7: Summary, Conclusions and Future Scope		83
7.1	Summary	83
7.2	Conclusions	84
7.3	Future Scope	85
