Abstract i
Acknowledgements iii
Contents v
List of Figures viii
List of Tables xi
List of Symbols xii
List of Abbreviations xiii

Chapter 1: Introduction
1.1 Two Dimensional Materials 1
1.2 Motivation 3
1.3 Objective 3
1.4 Outline of the Thesis 4

Chapter 2: Literature Review
2.1 Transition Metal Dichalcogenides monolayer 6
2.1.1 Synthesis methods of 2D TMDs 7
2.1.2 Electronic properties 8
2.1.3 Optical properties 9
2.1.4 Modification in electronic and optical properties 9
2.1.5 Applications 11
2.2 Janus Transition Metal Dichalcogenides monolayer 11
2.2.1 Synthesis method 12
2.2.2 Janus monolayers properties and applications 13

Chapter 3: Theoretical Details
3.1 Many-Body Problem 15
3.2 Density Functional Theory 16
3.2.1 Hohenberg-Kohn Theorem 17
3.2.2 Kohn-Sham Theorem 17
3.3 Exchange-Correlation Functional 18
3.3.1 Local Density Approximation 19
3.3.2 Generalized Gradient Approximation 19
3.4 Self-Consistent Field calculation 20
3.4.1 Crystal Structure 20
3.4.2 Bloch's Theorem 20
3.4.3 Basis Sets 21
3.4.4 Pseudopotentials 21
3.4.5 Force and Energy Minimization 22
3.5 Software Packages 22
3.5.1 Quantum ESPRESSO and WIEN2k 22
3.5.2BoltzTrap Package 22
3.5.3 Density Functional Perturbation Theory 24
3.5.4 SCAPS-1D Simulator 24

Chapter 4: Strain engineering of WS2, WSSe and WSe2 monolayers
4.1 Introduction 26
4.2 Computational Details 26
4.3 Results and Discussion 27
4.3.1 Structural stability 27
4.3.2 Electronic properties 28
4.3.3 Strain effect on structural stability 29

4.3.4. Strain effect on electronic properties 30
4.4 Conclusion 31

Chapter 5: Pristine and defect included MoSSe and WSSe monolayers for gas sensing application
5.1 Introduction 33
5.2 Computational Details 33
5.3 Results and Discussion 34
5.3.1 Electronic properties of antisite defect including WSSe monolayers 34
5.3.2 Adsorption of toxic gas molecules on pristine WSSe monolayer 35
5.3.3 Adsorption of toxic gas molecules on antisite defect including WSSe monolayers 40
5.3.4 Electronic properties of vacancy defect including MoSSe monolayers 42
5.3.5 Adsorption of toxic gas molecules on pristine MoSSe monolayer 42
5.3.6 Adsorption of toxic gas molecules on vacancy defect including MoSSe monolayers 45
5.4 Conclusion 49

Chapter 6: Janus WSSe and WSeTe buffer layer for WS2 and WSe2 absorber materials based solar cell
6.1 Introduction 51
6.2 Methodology 51
6.3 Results and Discussion 52
6.3.1 Electronic properties 53
6.3.2 Optical properties 55
6.3.3 SCAPS-1D simulation 55
6.3.4 Single junction solar cells analysis 57
6.3.5 Effect of absorber layer thickness 58
6.3.6 Effect of the absorber layer carrier concentration 59
6.3.7 Impact of defect density in the absorber layer and interface recombination speed at heterojunction 59
6.3.8 Effect of buffer layer thickness and carrier concentration 60
6.4 Conclusion 61

Chapter 7: Thermoelectric properties of pristine and strained WSSe monolayer
7.1 Introduction 63
7.2 Computational Details 63
7.3 Results and Discussion 64
7.3.1 Thermoelectric properties of unstrained monolayer 64
7.3.2Thermoelectric properties of biaxial strained monolayer 67
7.4 Conclusion 75

Chapter 8: Conclusion and future scope of work 77
References 84
