List of Symbols	xxi
List of Abbreviations	xviii
List of Publications from this Work	xxv
1 INTRODUCTION	1-8
1.1 Context and identification of the problem	1
1.1.1 Applications	2
1.1.2 Sources of nonlinearity and uncertainties	3
1.2 Significance of nonlinear analysis	4
1.3 Assumptions	7
1.4 Application of present work	5
1.5 Objectives	6
1.6 Outline and methodology	8
2 LITERATURE REVIEW	9-26
2.1 Historical development with time	9
2.2 Nonlinearities in rotor-bearing structures	11
2.2.1 Nonlinearities of Rotor/Shaft elements	11
2.2.2 Nonlinearities in Bearings	13
2.3 Perturbation technique: approximate solutions	15
2.3.1 Method of multiple scales (MMS)	16
2.4 Modal analysis	17
2.5 Forced vibration analysis	19
2.5.1 Unbalance/Eccentricity	19
2.5.2 Base excitation	20
2.5.3 Axial Loading	21
2.5.4 Rotor-stator interaction: Rubbing-impact phenomenon	23

2.5.5	A rotating system with viscoelastic effect	24
3	LARGE DEFLECTION MODEL: AXIAL STRETCHING EFFECT	27-68
3.1	Introduction	27
3.2	Mathematical formulation: Equation of motion	27
3.3	Excitation of a base motion and an unbalance mass	40
3.3.1	Analysis	40
3.3.2	Results and discussion	42
3.4	Excitation of an axial loading and an unbalance mass	53
3.4.1	Analysis	53
3.4.2	Result and Discussion	56
3.5	Summary	66
4	LARGE DEFLECTION MODEL: IN-EXTENSIBLE CONDITION	69-110
4.1	Introduction	69
4.2	Mathematical modeling	69
4.3	Free vibration analysis of the nonlinear shaft disk system	72
4.3.1	Analysis	72
4.3.2	Results and Discussions	73
4.4	Excitation of geometric eccentricity and extra added mass	82
4.4.1	Analysis	82
4.4.2	Result and Discussion	85
4.5	Excitation of an unbalance with rub impact phenomenon	95
4.5.1	Analysis	96
4.5.2	Result and Discussion	98
4.6	Summary	108
5	LARGE DEFLECTION MODEL: MULTI-DISK ROTATING SYSTEM	111-122
5.1	Introduction	111
5.2	Mathematical modeling	111
5.3	Viscoelastic shaft with base excitation	114
5.3.1	Analysis	114
5.3.2	Result and Discussion	115
5.4	Summary	121
6	CONCLUSIONS AND SCOPES FOR FUTURE WORK	123-128
6.1	General conclusion	123

6.2	Specific conclusions	124
6.3	Scopes for future work	127
7	REFERENCES	129-140
	APPENDIX	141
