

List of Figures

Figures	Title	page
3.1	Academic block ii building, located at “IIT, jodhpur” Jodhpur	9
3.2	C-Si Based 58 kW Rooftop Grid Tied Solar Photo Voltaic System	10
3.3	Schematic Diagram of C-Si SPV Plant	10
3.4	Academic Block I Building, located at “IIT, Jodhpur” Jodhpur	11
3.5	A-Si Based 43 kW Rooftop Grid Tied Solar Photo Voltaic System	12
3.6	Schematic Diagram of A-Si SPV Plant	12
3.7	Sunny sensor box	13
3.8	Relationship between the input parameters and solar power generation (a) Solar Radiation (kW/m^2) (b) Ambient Temperature($^{\circ}\text{C}$) (c) Module temperature ($^{\circ}\text{C}$) (d)Wind velocity	14
3.9	Scatter plot matrix for relationships between variables	14
3.10	MW Aerial view of MW Gujarat power Corporation limited solar photovoltaic power plant	15
3.11	Complete layout of 5 MW GPCL SPV plant	15
3.12	Satellite view of 5 MG GPCL SPV plant	15
3.13	Schematic block diagram of the considered PV plant (5 MW GPCL solar PV plant)	16
3.14	Schematic diagram of 5 MW GPCL SPV power plant.	17
3.15	(a) Daily averaged GHI (b) Averaged GTI (c) Ambient temperature (d) Module Temperature (e) Sun Availability and (f) Solar power plant generation	18
3.16	Relationship between the input parameters and solar power generation (a) Global horizontal irradiation (b) Global tilted irradiation (c) Ambient Temperature (d) Module temperature (e) Sun availability	19
3.17	Plotmatrix for input parameters	20
4.1	Block Diagram of A Human Nervous System	25
4.2	Structure of biological neuron structure	25
4.3	Data processing of a neuron	26
4.4	Artificial neuron structure	26
4.5	Outcome of different activation functions	28
4.6	Single layered feed-forward neural network	29
4.7	Multi-layered feed-forward neural network	29
4.8	Recurrent neural network	30
4.9	line diagram for a supervised back-propagation learning	31
4.10	Error Curve with respect to weight	31
4.11	Signal flow in multi-layered neural network	34
4.12	Schematic diagram of neural network methodology	36
4.13	Structure of ANN model	37
4.14	Signal flow of the network for computation	38
4.15	Log-Sigmoid Transfer Function	39
4.16	Simple summation and product type neuron model	40
4.17	Summation type Neural Network	41
4.18	Product type neural network	41
4.19	Summation and Product type neural network	42
4.20	Product -Summation type neural network	43
4.21	Generalized Neural Network model	45
5.1	Averaged monthly and yearly ambient temperature	51
5.2	Monthly variation of ambient and module temperature and solar irradiation	51
5.3	Monthly variation in final yield	51
5.4	Monthly variation in power generation of PV plant	52
5.5	Monthly variation in specific yield	52
5.6	Monthly variation in specific yield and final yield	52
5.7	Variation of monthly and yearly performance ratio	53

5.8	Variation of monthly and yearly Capacity utilization factor	53
5.9	Monthly variation in final yield	54
5.10	Monthly variation in max. Solar power generation	54
5.11	Monthly variation in specific yield	54
5.12	Monthly variation in specific yield and final yield	55
5.13	Variation of monthly and yearly performance ratio	55
5.14	Variation of monthly and yearly Capacity utilization factor	55
5.15	15 Minutes averaged solar irradiation during the day	56
5.16	15 Minutes averaged ambient and module's temperature measured during the day	56
5.17	15 Minutes averaged solar power generation during the day from (a) subsystem-1 (b) subsystem-2 (c) subsystem-3 (d) subsystem-4 (e) subsystem-5 and (f) subsystem-6	57
5.18	C-Si Solar photovoltaic plant (a) Power generation (b) Energy generation	57
5.19	A-Si Solar photovoltaic plant (a) Power generation (b) Energy generation	57
5.20	Comparison of daily variation in (a) Plant availability (b) Grid availability in various months	58
5.21	Comparison of daily variation in (a) Global horizontal irradiation (b) Global tilted irradiation	59
5.22	Min-Max range of daily average GHI and GTI in various months	59
5.23	Comparison of daily basis solar power generation in various months	60
5.24	Plant performance ratio using GHI and GTI with respect to solar power generation for the month of (a) March (b) April (c) May (d) June (e) July and (f) August	62
5.25	Monthly average performance ratio using GHI and GTI and CUF for various months	63
5.26	Monthly Variation in power generation and performance ratio for various months	63
5.27	Monthly variation in module temperature and performance ratio for various months	64
6.1	Feed-forward multi-layered neural network training structure	66
6.2	ANN performance (a) Training performance of ANN model (b) Variation in training parameters during training of ANN (c) Testing performance of ANN model	66
6.3	Comparison of ANN , GNN model with actual power output	67
6.4	(a) Training performance of ANN model (b) Variation in training parameters during training of ANN(c) Error Histogram for testing, training and validation phase (d) Testing performance of ANN model	68
6.5	Comparison of ANN , GNN model with actual power output	68
6.6	(a) Training performance of ANN model (b) Variation in training parameters during training of ANN(c) Error Histogram for testing, training and validation phase (d) Testing performance of ANN model	69
6.7	Comparison of ANN , GNN model with actual power output	69
6.8	(a) Training performance of ANN model (b) Variation in training parameters during training of ANN(c) Error Histogram for testing, training and validation phase (d) Testing performance of ANN model	70
6.9	Comparison of ANN , GNN model with actual power output	70
6.10	(a) Variations in solar radiation verses Time (b) Variations in wind velocity verses Time and (c) Variations in ambient temperature with respect to Time	72
6.11	Mean square error in ANN model	73
6.12	Solar power generation forecasting using ANN model	73
6.13	Error with respect the actual solar irradiation	74
6.14	Comparison of Actual Data, ANN and GNN model	74
6.15	Error Analysis of ANN and GNN Model	75
6.16	(a) Daily averaged GHI (b) Averaged GTI (c) Max. Ambient temperature (d) Module Temperature (e) Sun Availability and (f) solar power plant generation	77
6.17	Actual and forecasted solar power generation for month of(a) March (b) April (c) May (d) June (e)July and (f) August	79
A.1	Variation in daily averaged GHI and GTI	83
A.2	Correlation in between GHI and GTI	84
A.3	Solar power generation for the month of (a) March (b) April (c) May (d) June (e)July and (f) August	86

A.4	The daily forecasting error of three SPF models for the month of (a) March (b) April (c) May (d) June (e) July and (f) August	88
B.1	One-year solar power generation dataset	89
B.2	Comparison of solar power generation forecasting output of ARIMA and ANN models	89
B.2.1	Comparison of solar power generation forecasting output of ARIMA and ANN models for one month	90
B.2.2	Comparative error analysis of ARIMA and ANN models	90
