Abstract	i
Acknowledgements	iii
Contents	v
List of Figures	vii
List of Tables	viii
List of Symbols	xiii
List of Abbreviations	xv
<b>Chapter 1: Introduction</b>	<b>1</b>
1.1 Objectives of Thesis	2
1.2 Motivation and Application	2
1.2.1 Motivation	2
1.2.2 Applications of solar irradiance forecasting	3
1.3 Literature Review	4
1.3.1 Autoregressive moving average (ARMA)	4
1.3.2 Exponential smoothing (ES)	4
1.3.3 Artificial neural networks (ANN)	5
1.3.4 K-nearest neighbour (KNN)	6
1.3.5 Support vector regression (SVR)	6
1.3.6 Decision tree	6
1.3.7 Markov model	6
1.3.8 Hybrid model	7
1.4 Thesis Overview and Contributions	7
1.4.1 Preliminaries, predictive models and related work (Chapter 2)	9
1.4.2 Preprocessing techniques and error metrics (Chapter 3)	9
1.4.3 Ensemble forecasting of solar irradiance using data mining techniques (Chapter 4)	9
1.4.4 Short-term forecasting of solar irradiance using hybrid of wavelet transform and feedforward neural networks (Chapter 5)	9
1.4.5 Performance analysis of 58 kW multicrystalline-silicon and 43 kW amorphous-silicon grid connected rooftop solar PV systems (Chapter 6)	9
1.4.6 Conclusions (Chapter 7)	10
<b>Chapter 2: Preliminaries, Predictive Models and Related Work</b>	<b>11</b>
2.1 Solar Energy: Basics	11
2.2 Introduction	11
2.2.1 Objectives of the review	12
2.3 Data-Driven Models	13
2.3.1 Autoregressive Moving Average (ARMA)	14
2.3.2 Exponential smoothing (ES)	15
2.3.3 Artificial neural networks (ANN)	16
2.3.4 K-nearest neighbour (KNN)	18
2.3.5 Support vector machine (SVM)	19
2.3.6 Decision tree	20
2.3.7 Markov chain	21
2.3.8 Hybrid models	21
2.4 Conclusions	21
<b>Chapter 3: Data Mining/Data Preprocessing Techniques and Error Metrics</b>	<b>23</b>
3.1 Data Mining/Data Preprocessing Techniques	23
3.1.1 Normalization	23
3.1.2 Wavelet transform	24
3.1.3 Seasonal and trend decomposition using loess (STL)	25
3.1.4 K-means clustering	26
3.2 Error Metrics	27
3.2.1 Goodness of fit ( $R^2$ )	27
3.2.2 Forecast skill ( $S$ )	27
3.3 Conclusions	28

<b>Chapter 4: Short Term Forecasting of Solar Irradiance Using Hybrid of Wavelet Transform and Feedforward Neural Networks</b>	29
4.1 Introduction	29
4.2 Wavelet Transform of Solar Irradiance	29
4.3 Feedforward Neural Networks (FFNN)	30
4.4 Forecast Methodology of Wavelet Decomposed GHI Using FFNN	31
4.5 Results	32
4.6 Conclusions	33
<b>Chapter 5: ENSEMBLE FORECASTING of SOLAR IRRADIANCE USING DATA MINING TECHNIQUES</b>	39
5.1 Introduction	39
5.2 Proposed Methodology	39
5.3 Results and Discussions	42
5.4 Conclusions	44
<b>Chapter 6: Performance Analysis of 58 kW Multicrystalline-Silicon and 43 kW Amorphous-Silicon Grid-Connected Rooftop Solar PV Systems</b>	47
6.1 Introduction	47
6.2 System Description	48
6.2.1 <i>Technical description of 58 kW multicrystalline-silicon grid-connected roof-top system</i>	48
6.2.2 <i>Technical description of 43 kW grid-connected amorphous PV system</i>	49
6.3 Performance Characterization	50
6.3.1 <i>Total yield</i>	51
6.3.2 <i>Final yield/specific yield/yield factor</i>	52
6.3.3 <i>Performance ratio (PR)</i>	52
6.3.4 <i>PVUSA rating</i>	52
6.3.5 <i>Operation and maintenance issues with 58 kW multicrystalline-silicon PV system</i>	53
6.3.6 <i>Operation and maintenance issues with 43kW amorphous PV system</i>	53
6.4 Results and Discussions	54
6.4.1 <i>58 kW multicrystalline-silicon PV System</i>	54
6.4.2 <i>43 kW grid-connected amorphous-silicon PV system</i>	57
6.5 Conclusions	58
<b>Chapter 7: Conclusions and Future Works</b>	61
<b>References</b>	63
