List of Tables

Table	*Title*	*page*
1.1	Forecast horizon of various solar forecasting applications [Sayeef *et al.*, 2012]	3
1.2	Application of forecast information they can apply to, motivation and their corresponding examples [West *et al.*, 2014]	3
1.3	Hybrid models and the motivation behind ensembling	8
2.1	Data-driven and physical models	12
2.2	Relation between forecast horizons, forecast interval and related applications	12
2.3	Categorization of solar irradiance predictive model based on various approaches	13
2.4	Solar generation techniques and their forecast requirements	13
2.5	Solar operators and stakeholders and their forecast horizons	13
2.6	Forecasting methods, their strengths and limitations	19
3.1	Data pre-processing methods, their strength and limitations	26
4.1	Error comparison table for different models	32
5.1	Error comparison table for different models	44
5.2	Forecast skill comparison table for different models	44
6.1	Module Specifications of 58 kW PV system	49
6.2	Plant Specifications of 58 kW PV system	50
6.3	Module Specifications of 43 kW PV system	51
6.4	Plant Specifications of 43 kW PV system	51
