Abstract		vii
Contents		ix-x
List of Figures		xi-xii
List of Tables		xiii
List of Symbols		xv
List of Abbreviations		xvii-xviii
Chapter 1: Introduction		1-3
Chapter 2: Literature Review		
2.1	Energy requirements in India	5
2.2	Future of coal technologies	5
2.3	Need of high strength materials for USC power plants	6
2.4	Welding in power plant boilers	6-7
2.5	Fusion welding	7
	2.5.1 Shielded metal arc welding	7-8
	2.5.2 Flux coated welding electrodes	8
	2.5.3 Commonly used flux coating ingredients and their functions	9
2.6	2.6 Design and development of electrode coatings	10
	2.6.1 Physicochemical behavior of electrode coatings	10-12
	2.6.2 Flux coating development and its effect on weld performance	12-15
2.7	Dissimilar metal welds	15-16
	2.7.1 Dissimilar welding of ferritic-Martensitic to ferritic-Martensitic and Ferritic-Martensitic to austenitic stainless steels	16-20
2.8	Hot corrosion investigations on Ferritic-Martensitic to ferritic-Martensitic steel welds and Ferritic-Martensitic to Austenitic stainless-steel welds	20-22
Chapter 3 Problem Formulation		
3.1	Motivation for Research	23
3.1	Research objectives	23
3.2	Research plan	23-24
Chapter 4: Experimentation		
4.1	Materials	25
4.2	Extreme vertices design (Design of Experiment)	25-26
4.3	Design of welding electrode coatings	27-28
4.4	Experimentation	29
	4.4.1 Electrode coating preparation	29
	4.4.2 Physicochemical and Thermophysical characterization of electrode coatings	29
	4.4.2.1 Density	29
	4.4.2.2 Thermal properties (Weight loss, change in enthalpy, thermal conductivity, thermal diffusivity and specific heat)	29
	4.4.2.3 High temperature wettability properties measurements	29-31
	4.4.3 Structural characterization	32
	4.4.4 Manufacturing of coated electrodes	32
	4.4.5 Welding parameter selection	32-33
	4.4.6 Multipass bead on plate analysis	33
	4.4.7 Preparation of weld coupons and fabrication of dissimilar welds	33
	4.4.7.1 Fabrication of P22/91 dissimilar weld using developed and commercial electrodes	33-34
	4.4.7.2 Fabrication of P91/SS304L dissimilar weld using laboratory developed and commercial electrodes	34-35
	4.4.8 Weld characterization	35-36
	4.4.9 Hot corrosion investigations	36-37

Chapter 5 Results and Discussion		
5.1	Development of Regression models for Physicochemical and Thermophysical properties of developed electrode coatings	39-40
	5.1.1 Regression analysis of physicochemical and thermophysical properties	40-46
	5.1.2 Effect of coating ingredients and their interactions on the properties	46
	5.1.2.1 Density	46
	5.1.2.2 Weight loss	46-47
	5.1.2.3 Change in enthalpy	47-48
	5.1.2.4 Thermal properties	48
	5.1.2.5 Wettability properties	49-50
	5.1.3 Contour surface plots for various properties	50-51
	5.1.4 Multi objective optimization and model validation	51-55
5.2	Phase and structural analysis of electrode coatings	55-56
5.3	Multipass bead on plate analysis (ER90S-B3 based electrodes)	56
	5.3.1 Qualitative analysis with bead chemistry and microhardness	56-58
	5.3.2 Development of Regression models and regression analysis for weld bead chemistry and Vickers's Microhardness	58-60
	5.3.3 Effect of coating ingredients and their interactions on weld bead chemistry and microhardness	61
	5.3.3.1 Effect of electrode coating ingredients on weld chemistry	61-62
	5.3.3.2 Effect of coating on the microhardness of different weld	62
	5.3.3.3 Contour plots of various weld responses	62-63
	5.3.4 Model validation and multi objective optimization	63-64
5.4	Multipass bead on plate analysis (Inconel-82 based electrodes)	65-66
5.5	Selection of electrodes to fabricate P22/P91 and P91/SS304 dissimilar welds	66
5.6	Fabrication and characterization of P22/P91 dissimilar welds	67
	5.6.1 Fabrication, preliminary inspections and weld chemistry	67
	5.6.2 Weld microstructure investigation and analysis	67-69
	5.6.3 Comparison of weld's mechanical behavior	69-73
5.7	Hot corrosion investigations on P22/P91 dissimilar welds	73
	5.7.1 Thermogravimetric analysis and oxidation kinetics	73-75
	5.7.2 X-Ray Diffraction analysis of weldments	76
	5.7.3 SEM/EDS Analysis	77
	5.7.3.1 Welds exposed to $\text{Na}_2\text{SO}_4 + \text{V}_2\text{O}_5$ (SM1)	77-80
	5.7.3.2 Welds exposed to $\text{Na}_2\text{SO}_4 + 50\% \text{NaCl}$ (SM2)	80-82
5.8	Fabrication and characterization of P91/SS304L dissimilar welds	82
	5.8.1 Fabrication, preliminary inspections and weld chemistry	82-83
	5.8.2 Metallurgical examination of P91/SS304L welds	83-85
	5.8.3 Comparison of weld's mechanical behavior	85-89
5.9	Thermogravimetric behavior of P91/SS304L dissimilar welds	90-91
Chapter 6 conclusion and Future Scope		
6.1	Conclusions	93-95
6.2	Scope for future work	95
