Abstract		vii
Contents		ix
List of Figures		xi
List of Tables		xiv
List of symbols		xv
List of Abbreviations		xvii
Chapter 1: Introduction		1
1.1	Overview	1
1.2	Organisation of the thesis	5
Chapter 2: Literature Review		7
2.1	Offshore structures	7
2.2	Materials with offshore applications	8
2.3	Welding of offshore components	17
2.3.1.	Welding of pipeline steel	17
2.3.2.	Welding of super duplex stainless steel	19
2.3.3.	Need for dissimilar welding of pipeline/super duplex stainless steel	20
2.4	Design & development of SMAW electrode coating	21
2.4.1.	Shielded metal arc welding (SMAW) process	22
2.4.2.	Nature and role of coating constituents	22
2.4.3.	Effect of coating constituents on weld	23
2.5	Gas tungsten arc weld (GTAW) for offshore applications	25
2.5.1.	GTAW process	25
2.5.2.	Fabrication and characterization of dissimilar offshore welds using GTAW process	26
2.5.2.1.	Selection of consumable for GTAW process for super duplex stainless steel	26
2.5.2.2.	Characterization on welds for offshore applications	27
Chapter 3: Problem Formulation		31
3.1	Motivation for this research	31
3.2	Research objectives	31
3.3	Work plan	32
Chapter 4: Experimentation		33
4.1	Materials	33
4.2	Design of experiment and formulation of SMAW electrode coating	34
4.3	Development of SMAW coated electrodes	37
4.4	Characterization of electrode coating	37
4.4.1.	Physicochemical and thermophysical properties	38
4.4.2.	Structural analysis	38
4.4.3.	Wettability properties	38
4.5	Multi pass bead on plate experiment	39
4.6	Regression analysis	40
4.7	Fabrication of welds	40
4.7.1.	Shielded metal arc welding (SMAW)	40

4.7.2.	Gas tungsten arc welding (GTAW)	40
4.8	Metallurgical and mechanical characterization	41
4.8.1.	Metallurgical characterization	41
4.8.2.	Mechanical characterization	41
Chapter 5: Results & Discussions		43
5.1	Formulation and characterization of SMAW electrode coatings	43
5.1.1.	Characterization of electrode coatings	43
5.1.2.	Experimental results of electrode coating characterization	45
5.1.3.	Regression models for electrode coating properties	47
5.1.4.	Structural characterization of electrode coatings	54
5.1.5.	Utilization of mineral waste red ochre as electrode coating constituent	55
5.2	Development of SMAW electrode and multi pass bead on plate experimentation	56
5.2.1.	Qualitative examination of multi pass bead on plate	57
5.2.2.	Bead microstructure and dilution	57
5.2.3.	Microhardness measurement of multi pass bead on plate	58
5.2.4.	Multi pass bead on plate weld chemistry	59
5.2.5.	Regression models for multi pass bead on plate: Weld metal chemistry and microhardness	59
5.3	Multi response optimization	65
5.4	Selection of most suitable electrode coating compositions	66
5.5	Dissimilar joining of API X70/ super duplex steel 2507 by SMAW process: fabrication & characterization	67
5.5.1.	Weld geometry & parameters	68
5.5.2.	Mechanical characterization of welds	69
5.5.3.	Metallurgical characterization of welds	72
5.5.4.	Wear & corrosion behavior of SMAW welds	79
5.5.4.1.	Wear characterization	79
5.5.4.2.	Corrosion characterization	81
5.6	Dissimilar joining of API x70/ super duplex steel 2507 by GTAW process: Fabrication & characterization	81
5.6.1.	Weld geometry & parameters	82
5.6.2.	Metallurgical characterization of welds	83
5.6.3.	Mechanical characterization of GTA welds	91
5.6.4.	Characterization of welds for corrosion resistance	93
5.7	Effect of heat treatment on wear & corrosion behavior of super duplex stainless steel 2507	98
5.7.1.	Wear behavior investigations of super duplex stainless steel 2507	98
5.7.2.	Corrosion behavior investigations of super duplex stainless steel 2507	105
Chapter 6: Conclusions & Scope for future work		109
6.1	Conclusions	109
6.1.1.	Development of SMAW electrodes for offshore applications	109
6.1.2.	Fabrication & characterization of pipeline steel API x70/super duplex stainless steel 2507 weld using SMAW process	110
6.1.3.	Fabrication & characterization of pipeline steel API x70/super duplex stainless steel 2507 using GTAW process	111
6.1.4.	Effect of heat treatment on wear & corrosion behaviour of super duplex stainless steel 2507	112
6.2	Future scope of work	112
