Abstract		*v*
Acknowledgements		*vii*
Contents		*ix*
List of Figures		*xi*
List of Tables		*xiii*
List of Symbols		*xv*
List of Abbreviations		*xvii*
Chapter 1:	**Introduction**	1
1.1	Brief Introduction to image quality assessment and image enhancement	2
1.1.1	*Image Quality Assessment (IQA)*	2
1.1.2	*Image Enhancement*	4
1.2	Need of new IQA and enhancement methods for Fundus images	4
1.3	Distortions and causes affecting the quality of fundus images	5
1.4	Research Objectives of the Thesis	6
1.5	Contributions of the Thesis	8
1.6	Thesis Outline	8
Chapter 2:	**Literature Survey**	11
2.1	Survey of Fundus Image Quality Assessment Algorithms	11
2.1.1	*Similarity Based Methods*	11
2.1.2	*Segmentation based methods*	13
2.1.3	*Machine learning based methods*	16
2.1.3.1	Feature Extraction Based on Structural Analysis	16
2.1.3.2	Feature Extraction Based on Generic Image Statistics	19
2.1.3.3	Feature Extraction Based on Convolutional Neural Networks (CNN) Models	21
2.2	Survey of the fundus image enhancement methods	22
2.3	Limitations	24
2.3.1	*Limitation of fundus IQA works*	24
2.3.2	*Limitation of fundus image enhancement methods*	25
2.4	Contributions	27
2.5	Summary	27
Chapter 3:	**The Fundus Image Quality Assessment (FIQuA) Data-set**	29
3.1	Description and Peculiarities of the Proposed FIQuA Data-set	30
3.2	Analysis of Subjective Quality Assessment	31
3.3	Summary	33
Chapter 4:	**The Multivariate Regression based Neural Network Model Fundus Image Quality Assessment**	35
4.1	Model Description	35
4.2	Implementation Details	38
4.3	Results and Analysis	39
4.3.1	*Evaluation methodology*	39
4.3.2	*Performance evaluation of Block-1*	40
4.3.3	*Performance evaluation of Block-2*	41
4.3.4	*Cross Data-set evaluation*	42
4.4	Summary	43
Chapter 5:	**RDC-UNet: A UNet Based Model for Low Quality Fundus Image Enhancement**	45
5.1	Implementation of frequently occurred distortions	46
5.2	Proposed Model	49
5.2.1	*Preliminaries*	50
5.2.2	*Proposed RDC-UNet for Fundus Image Denoising*	52
5.2.3	*Implementation Details*	53
5.3	Results and Analysis	54
5.3.1	*Data*	54
5.3.2	*Evaluation Methodology*	55

5.3.3 *Performance analysis over synthetically degraded fundus images* 56
5.3.4 *Performance analysis of naturally degraded fundus images* 57
5.3.5 *Quality evaluation* 58
5.3.6 *Blood Vessel Segmentation* 58
5.4 Discussion 59
5.5 Summary 61

Chapter 6: Conclusions and Future works 63
6.1 Conclusions 63
6.2 Recommendations for Future Work 64
6.2.1 *Smartphone Funduscopy:* 64
