

Acknowledgements

I am grateful to the God for the good health and strength that were necessary to complete this work.

It is my pleasure and privilege to thank many individuals who made this thesis possible. First and foremost, I would like to express my special appreciation and thanks to my Ph.D. Thesis Supervisors, *Professor Akhilesh Mohan* and *Professor Sandeep Kumar Yadav* for continuous encouragement and motivation. Words cannot express how grateful I am to my supervisors, who gave me the freedom to explore on my own, and at the same time guidance to recover when my steps faltered. Your advice on both research as well as on my career have been priceless.

I acknowledge and thank to all the non-teaching staff and technical staff at the Department of E &EC of IIT Kharagpur for helping me in the experimental characterization of the designs. My research would not have been possible without their helps.

I am thankful to colleagues and friends at IIT-Jodhpur and IIT-Kharagpur, Parmod Paul, Kapil Sharma, Amrik Singh, Dharmendra Jhariya and Amit Ranjan, for the stimulating discussions, working together, constant encouragement and for all the fun we have had in the last three and half years.

A special thanks to my family. I would like to thank my parents, wife, sister and nephews for all the sacrifices that you have made on my behalf. I was able to come so far because of your prayer, blessing and support.

Shrivishal Tripathi
Ph.D. Student
