

List of Tables

<i>Table</i>	<i>Title</i>	<i>page</i>
3.1	Fidelity Factor of the Proposed Antenna	22
3.2	Optimized Geometrical Parameters of the Proposed UWB Antenna	23
3.3	Fidelity Factor of the Proposed Antenna	29
3.4	Optimized Geometrical Parameter of the Presented UWB Antenna	32
3.5	Fidelity Factor of the Proposed Antenna	35
3.6	Fidelity Factor of the Proposed Antenna	40
3.7	Fidelity Factor of the Presented Antenna	45
3.8	The effective area and length of the proposed UWB antenna	47
3.9	Optimized geometrical parameter of the proposed UWB antenna	48
3.10	Fidelity Factor of proposed Fractal Antenna	52
3.11	Optimized geometrical parameter of the proposed UWB antenna	53
3.12	Fidelity factor of the proposed antenna	58
3.13	Comparison of the proposed work with others presented in the literature	58
4.1	Optimized geometrical parameters of the proposed UWB antenna	64
4.2	A Comparative analysis between proposed work and others available in the literature	74
5.1	Details of p-i-n Diodes Different Cases and Frequency Bands of the Proposed Reconfigurable UWB Antenna	80 82
5.2	Fidelity Factor of the Proposed Antenna	
5.3	Details of p-i-n Diodes Different Cases and Frequency Bands of the Proposed Reconfigurable UWB Antenna	85
5.4	Fidelity Factor of the Proposed Antenna	87
5.5	Comparison of the proposed work with others proposed in the literature	88
6.1	Comparison of the proposed work with others presented in the literature	115
7.1	The Electrical Properties of Tissues with Respective Thickness	120
7.2	Comparison of the proposed work with others work presented in the literature	133
