

Acknowledgements

By meeting many research groups and learning about various research fields during my Ph.D., I have come through an interesting travel and I am more than happy to acknowledge all those people who have helped me and motivated me during this travel of my life.

First of all, I deeply thank my supervisor *Professor Shree Prakash Tiwari* for his kind supervision, guidance and motivation during my entire Ph.D. tenure. His invaluable advice, ideas and understanding nature always helped me to remain passionate about my work.

Nobel Laureate Professor Klaus von Klitzing gave me an excellent opportunity to do an internship in *Max Planck Institute (MPI) for Solid State Research*, Germany, which eventually led me working in my dream group of *Dr. Hagen Klauk*. For the same, I show my sincere gratitude to *Professor Klaus von Klitzing*. This internship played a huge role in bringing my Ph.D. to a decent, successful end and adding a lot of nice experiences and joy to my life.

For making me a part of the "*Organic Electronics Research Group*", being my co-supervisor, guiding me in my research work, motivating me during my Ph.D. and helping me in all my problems, I am very grateful to *Dr. Hagen Klauk*.

I extend thanks to *Dr. Ute Zschieschang* for having various fruitful discussions and guidance in various things which include working independently in the laboratory to swimming. I am indebted to my whole "*Organic Electronics Research Group*" in MPI i.e. *Mahdieh Aghamohammadi, Mirsada Sejfic, Muriel De Pauli, Reinhold Rödel, Robert Hofmockel and Ulrike Kraft* for all the useful scientific discussions, for maintaining flexible atmosphere to work in flexible electronics, and for all kind support, which is not explainable in words. I would like to acknowledge *Professor Kazuo Takimiya* and *Dr. R. Thomas Weitz (BASF SE, Ludwigshafen, Germany)* for providing us the organic semiconductor materials to work on during my Ph.D. I would like to sincerely appreciate all other people in MPI who have somehow supported and guided me during the journey of my Ph.D.

At IIT Jodhpur, many faculty members including my Doctoral Committee helped and supported me directly or indirectly during my Ph.D. work. For the same, I am thankful to *Professor Ambesh Dixit, Professor Mahesh Kumar, Professor Rakesh Sharma, and Professor Satyajit Sahu*. I am also thankful to *Professor Swagat Kumar* (presently with TCS), and *Professor V. Seena* (presently with IIST Thiruvananthapuram), and all other people associated with IIT Jodhpur for their support. I am grateful to all people from CEERI Pilani and IIT Bombay who have helped me, during the summer internship and projects, which eventually helped me in deciding my initial area of work.

Finally, I express my gratitude to my parents, my lovely sister, brother, brother-in-law, my little nephew, and all friends who have supported and loved me during my journey of Ph.D.

Sibani Bisoyi
Ph.D. Student
