Chapter 1: INTRODUCTION	
1.1 Cross Layer Design	1
1.2 Challenges with Cross Layer Design	2
1.3 Experimentation Systems	3
1.4 Thesis Objectives	3
1.5 Thesis Organization	3
Chapter 2: LITERATURE OVERVIEW	
2.1 7 Layer OSI Model	5
2.2 Cross Layer Design : State of the Art	6
2.2.1 Bit Rate Adaption Protocols	8
2.2.2 ZigZag Interference Cancellation	9
2.2.3 Error Correction Techniques	9
2.2.4 CMAP MAC Protocol	10
2.2.5 Frequency Aware Protocols	10
2.3 Radio Front End Impairments	11
Chapter 3: Proposed New Cross Layer Protocol	
3.1 Introduction	13
3.2 Experimentation System	14
3.3 Radio Front End Impairments	17
3.4 Measuring Quadrature Skew and Gain Imbalance	20
3.5 Definition of cross layer protocol	23
3.6 Summary	28
Chapter 4: Framework for Evaluation of Experimentation Systems	
4.1 Need for experimentation systems	30
4.2 Evaluation Frameworks	33
4.3 Academic Systems	36
4.3.1 MIT Airblue Platform	36
4.3.2 RICE WARP System	39
4.3.3 UT Hydra System	40
4.4 Commercial Systems	42
4.5 Comparison of existing systems using proposed framework	43
4.6 Summary	46
Chapter 5: Low Latency Reconfigurable MAC Design	
5.1 Motivation	48
5.2 MAC Layer Requirements	49
5.3 Challenges with SDR for MAC Layer Prototyping	53
5.4 Design Feasibility	56
5.5 Summary	62
Chapter 6: Summary and Conclusions	
6.1 Summary	64
6.2 Closing Comments	64
