

List of Tables

<i>Tables</i>	<i>Title</i>	<i>page</i>
1.1	Summary of different CPL compensation techniques for dc distribution systems	19
2.1	Parameters of boost converter and the proposed PWM based SMC	28
2.2	Scaling factors to determine the actual values of the variables	31
3.1	Parameters of the proposed PWM based SMC for buck converter	68
3.2	Specifications of the experimental setup of buck converter system	70
4.1	Parameters of buck-boost converter and the proposed SMC	80
4.2	Parameters of bidirectional dc/dc converter and the proposed SMC	91
5.1	Islanded dc microgrid with composite load: System specifications and controller parameters	105
5.2	Different modes of operation of bidirectional dc/dc converter	110
5.3	Specifications and controller parameters of realized dc microgrid	117
5.4	Scaling factors to determine actual values of the variables	119
